

## Park Development Plan

Withers and Ravenel is proposing to do the park development in stages in order to ensure that the best contractors are secured at the best pricing and to have sufficient time to choose the best materials for trails, parking areas, benches, swings, the restrooms, and the shade structure. Stage 1 would include site prep, the trails, and the parking area. Stage 2 would be planned and decided upon soon after Stage 1 has begun.

At the September 24 meeting a main decision will be the number of parking spaces. We will share with you in advance of the meeting a set of drawings on the Stage 1 design.
