November 14, 2013 Work Session

Police Department

- Emergency Responder requirements
- Traffic Control
- Alcohol consumption on the Beach Strand
- Peak Season enforcement challenges
- Parking Regulations, Paid Parking, Designated Parking - where
- Fireworks & other dangerous activities
- Parking Violation Enforcement

Fire Department

- Emergency Responder requirements
- Shading devices making them further apart to give more space to maneuver our response vehicle's on the beach.
- Would like to consider purchasing a smaller side by side with a transport for the beach this would allow us to maneuver the beach easier and give us a better visibility.
- Currently the two accesses exist at the Gazebo and the east end. During peak season response, times to the west end suffer to poor access.
- Access to the beach for emergency ops during the summer must be maintained, the surfaces need to be controlled throughout the year.
- The need for first responders on the strand during the peak of our vacation season.
