**Reference: Town of Sunset Beach 2016 Shoreline Management & Pre-Dredge Analysis
Water Resource Development Grant
Clarification of Project Narrative**

Dear Mr. England:

The following is offered to clarify the project narrative for the above referenced Water Resource grant agreement. The grant was approved by the Town of Sunset Beach on August 1, 2016. However, the project narrative indicated the navigation project would “maintenance” dredge approximately 3.5 miles of canals and feeder channels. The narrative should clarify the dredging will include “new” and “maintenance” work.

As show on the site plan included in the grant application, the majority of the “new” dredging includes approximately 6,800 ft within Jinks Creek. The dredging in this area will provide navigational access from previously dredged residential canals along North Shore Drive to the AIWW. The project also proposes to conduct “new” work within the Canal Drive Bay Area, which also services residential docks and connects to Jinks Creek.

The Town of Sunset Beach appreciates your willingness to accept this clarification to remove any potential miss-understandings with the project intent. If there are any questions pertaining to this clarification, please feel free to contact myself or Susan Parker, the Town Administrator at 910.579.6297.

Sincerely,

TOWN OF SUNSET BEACH

Robert Forrester, Mayor
